## Skills

### 1. Design Tools :

- **Figma:** Wireframing, prototyping, user research, and user-centered interface design.
- **Notion:** Workflow Management, Collaboration, and Documentation.
- **Miro:** User flows to visually map out and optimize the user journey effectively.

### 2. Web Development:

HTML, CSS: Basic Understanding of Web Page Structure and Style.

## Projects

- Food Ordering App [View Project](#)
- Online Tuition Website [View Project](#)
- Bakery Ordering App [View Project](#)

## About Me

As a future User Experience (UX) Designer with practical experience gained from my internship at GleamCX, I hope to apply my knowledge of wireframing, prototyping, and user research to produce designs that are user-centered and intuitive. Contributing to a cooperative team where I can advance my knowledge and improve the digital product user experience is my aim.

## Education

- **Bachelor of Science in Information Technology from Amity University Ranchi | 2021 - 2024**
- **DAV Public School Khunti | 2009-2020**

## Work Experience

### UX Design Intern at Gleam CX | [gleamcx.com](https://gleamcx.com) | June 2024 - Dec 2024

**Designed and Prototyped Interfaces:** I made user-friendly designs for important screens like the homepage, order status page, thank-you page, and settings page.

**Learned and applied Polaris Design System:** To stay consistent and follow Shopify app design guidelines while learning about Shopify user-side views.

**Resolved Usability Issues:** Fixed issues with the prototype, including making interactive features like the shipping address section's clickable alternatives better.

**Cooperated Across Teams:** Closely collaborated with project managers and developers to match design outputs to technical viability.

## Certifications

**UX Design Certification | Coursera, Google | July 6, 2023**
