I am a professional UI/UX designer. I have hands-on experience with Figma, wireframing, prototyping, etc. I gained these skills during my time at GleamCX. I am passionate about further improving my experiences.

WORK EXPERIENCE

UI/UX Designer

My responsibilities include:

- ✔ User Interface (UI) Design – Created visually appealing, user-friendly interfaces for the Shopify app.
- ✔ User Experience (UX) Design – Focused on designing seamless and intuitive user flows.
- ✔ Wireframing & Prototyping – Designed wireframes and interactive prototypes to visualize app interactions.
- ✔ Polaris Design System Implementation – Applied Shopify’s Polaris guidelines for design consistency.
- ✔ Homepage & Key Screens – Designed the homepage, thank-you page, order status page, and settings page for a smooth user journey.
- ✔ Interaction Design – Worked on button states, component behaviors, and interactive elements.
- ✔ Problem Solving – Addressed issues like prototype interactions (e.g., fixing the first-click issue on the shipping address).
- ✔ Design Consistency – Ensured proper alignment, spacing, and layout consistency across all screens.
- ✔ Collaboration – Coordinated with developers and stakeholders to align the design with business goals.
